DETAILED ACTION

Reason for allowance

The following is an examiner's statement of reason for allowance: None of the references of record teaches or suggests the claimed Semiconductor Package with Substrate Coupled to a Peripheral Side Surface of a Semiconductor Die having:

- the first surface of the substrate is coupled to only a first one of the four peripheral side surfaces of the semiconductor die, the third surface of the substrate is coplanar with the active surface of the semiconductor die, and the bond pads of the semiconductor die are electrically coupled to the conductive circuit patterns of the third surface of the substrate.
- First and second substrates each comprising a first surface, a second surface opposite and parallel to the first surface, a third surface extending between the first and second surfaces, and conductive circuit patterns at the first and second surfaces, wherein the third surface of the first substrate is coupled only to a first of the four side surfaces of the semiconductor die, the third surface of the second substrate is coupled only to a second of the four side surfaces of the semiconductor die, the second side surface being opposite to the first side surface, and the first surface of each of the two substrates is coplanar with the active surface of the semiconductor die.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance".
